TECHNICAL ENGLISH 2020-2021 Fall Semester

Write an essay on:

“How information technology effected/ effects/ will effected a student/teacher/ researcher/ housewife/ engineer/artist/ composer/ writer/ poet/ doctor/ nurse/ librarian/ architect/ secretary/ Project manager/ driver/journalist / lawyer/ cook/ farmer?”

Your essay should contain at least 300 words and at maximum it should contain 350 words.

You have to use at least 20 words from the following list in a meaningful context:

Abundance	Distinguished	Policy	Commitment	Individual	Scalable
Accessibility	Distributed	Portable	Compatibility	Inference	Sequence
Accuracy	Diverse	Precise	Competitive	Infrastructure	Seamless
Adoption	Drastically	Prediction	Competitors	Innovation	Search engine
Ad hoc	E-commerce	Preference	Compilation	Insertion	Security
Antecedent	Effectively	Prevalent	Complicated	Instantly	Senior clients
apparent	Efficiency	Primitive	Component	Instinctive	Sensor
Application software	Efficient	Preventative	Comprehensive	Intangible	Sequentially
Artifact	E-mail server	Printer	Comprehensive	Integrity	Spam
Artificial Intelligence	Embedded Systems	Privacy	Concern	Intent	Spreadsheet
Aspect	Encryption	prototype	Concrete	Intention	Sequentially
Assumption	Error prone	Proactive	Concurrently	Interactive	Shortcoming
Attraction	Evidence	Processor	Confidentiality	Interchangeable	Significant
Attribute	Evolution	Profitable	core	persistent	Significantly
Auditing	Feasibility	Promising	Configuration	Invention	Simulation
Augmented Reality	Fine	Protocol	Configuration	Investigation	Simultaneously
Audience	Firewall	Prototype	Congestion	iterative	transaction
Authorization	Flexibility	Publicly	Connectivity	Keyword	Source code
Autonomous	Flexible	Redirection	consumption	Laser jet	Symptom
Availability	Forecast	Reduction	Consequence	Launched	Specification
Awareness	Forensic	Redundancy	Consequent	Legitimate	Spreadsheet
B2B	Framework	Remarkably	Consequently	Liability	Spyware
B2C	Freedom	Remotely	Considerable	License	Stand alone
Bandwidth	Gloves	Repetitive	Convenient	Limitation	Steadily
Barrier	Gradually	Repository	Consistency	Mainframe	Stored program
Batch processing	Guidance	Requirement	Consistent	Mainly	Straightforward
Beneficial	Hackathon	Resilient	Consortium	Maintenance	Subset
Broadcast	Hierarchical	Resolution	Constantly	Malfunction	Substantial
Certificate	Interface	Responsibility	Constraint	Malware	Surveillance
Classification	Immerse	Revolution	Consultancy	Massive	Suspicious

Collaborative	Implementation	Router	Consumption	Multi disciplinary	temporary
Combination	Impact	Rule	Consumption	Metropolitan	Synchronize
Commercial	Implementation	Satellite	Context	Milestone	Template
Unique	URL	Netiquette	Convenience	Multidimensional	Tremendous
CPU	utility	obstacle	Conventional	Multidisciplinary	Ubiquitous
Crucial	network	offline	debugger	Neat	unique
Cyber attack	vehicle	database	CPU	Netiquette	URL
Cyberspace	Operating System	Versatile	Default	visualisation	Vital
Database	Opportunity	Version	Dependency	Peripheral	Worm
Disability	Optional	Vicinity	Desktop publishing	Permanent	Vulnerable
Decentralized	Participant	Virtual reality	Despite	Peer to peer	Web browser

You have to use at least 20 verbs from the following list in a meaningful context and in the correct tense.

to abandon	to disseminate	to manipulate	to debug	to insert	to upload
to access	to distinguish	to manufacture	to decline	to install	to utilize
to accomplish	to distribute	to mature	to decompose	to integrate	to take over
to accumulate	to validate	to merge	to decipher	to interconnect	to translate
to activate	to dominate	to modify	to derive	to interrupt	to transform
to adjust	to download	to navigate	to detect	to invent	to underestimate
to adopt	to edit	to negotiate	to deter	to investigate	to utilize
to allocate	to elaborate	to obtain	to determine	to invoke	to validate
to annotate	to embed	to operate	to collaborate	to generalize	to register
to announce	to encode	to optimize	to contribute	to highlight	to refine
to articulate	to entertain	to perceive	to combine	to customize	to rely on
to assert	to envision	to personalize	to compile	to host	to interact
to associate	to estimate	to prevent	to complete	to illustrate	to replicate
to assist	to evolve	to proceed	to comprehend	to implement	to represent
to assume	to examine	to process	to conceive	to imply	to resemble
to authenticate	to execute	to promote	to conceal	to improve	to retain

to authorize	to expand	to quantify	to conduct	to incorporate	to retrieve
to back up	to extend	to rebrand	to configure	to increase	to steer
to back off	to facilitate	to recognize	to confirm	to index	to diagnose
to cascade	to forward	to reduce	to consume	to inherit	to struggle

You can choose your topic by making combinations from the alternatives that are separated with slash marks. For example:

- *How information technology effected an architect?*
- *How information technology will effect a teacher?*
- *How information technology effects a driver?*

If you want you can write two essays that contain 150 words at minimum and at maximum it should contain 200 words. In that case you have to write the title of each essay separately and in each essay you have to use at least 12 words from each group.

Important Note:

- You have to write your essay in Microsoft Word with Times New Roman 12pt
- You have to use **bold** characters to indicate the vocabulary from the above lists. For ex:

*Nowadays, **e-commerce** is very popular.*

Submission deadline: 12.Feb.2021 Friday 15:00 pm
